

Senior VR Developer Job Description

We are looking for a highly skilled Senior VR Developer who will be responsible for designing, developing, and optimizing immersive virtual reality applications. You will work closely with development and design teams to deliver high-quality VR experiences while contributing to system architecture and technical decision-making. Duties include building advanced 3D environments, improving performance, and ensuring seamless user interaction.

A bachelor's degree in computer science, game development, multimedia, or a related field is required. Candidates should have 4 to 7 years of experience in VR development, game development, or related roles.

Senior VR Developer Responsibilities:

- Designing and developing advanced virtual reality applications and experiences.
- Building and optimizing interactive 3D environments and simulations.
- Writing efficient, scalable, and maintainable code for VR systems.
- Collaborating with designers and developers to create immersive user experiences.
- Optimizing VR applications for performance, latency, and responsiveness.
- Integrating VR hardware such as Oculus, HTC Vive, and other platforms.
- Debugging, testing, and maintaining VR applications.
- Contributing to architectural decisions and technical improvements.
- Mentoring junior developers and supporting team development.
- Staying updated with the latest VR/AR technologies and industry trends.

Senior VR Developer Requirements:

- A bachelor's degree in computer science, game development, multimedia, or a related field.
- 4 to 7 years of experience in VR development, game development, or related roles.
- Strong experience with VR development platforms such as Unity or Unreal Engine.
- Proficiency in programming languages such as C#, C++, or JavaScript.
- Solid understanding of 3D graphics, rendering, and physics engines.
- Experience with VR SDKs such as OpenXR, Oculus SDK, or SteamVR.
- Strong knowledge of UX design in immersive environments.
- Excellent problem-solving and analytical skills.
- Good communication and teamwork abilities.
- Ability to mentor junior developers and contribute to team success.
