

Full-Stack Developer Job Description

We are looking for a skilled and versatile full-stack developer who, along with our development team, will be responsible for designing, developing, and maintaining both front-end and back-end components of web applications. Duties will include but are not limited to building scalable systems, optimizing application performance, and ensuring seamless integration between client-side and server-side logic. You will collaborate with designers, product managers, and other engineers to deliver efficient and user-friendly solutions.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 2 to 5 years of experience in full-stack or web development or related roles.

Full-Stack Developer Responsibilities:

- Designing, developing, and maintaining full-stack web applications.
- Writing clean, efficient, and maintainable code using languages such as JavaScript, Python, or Java.
- Developing front-end interfaces using HTML, CSS, JavaScript, and frameworks such as React, Angular, or Vue.js.
- Building back-end systems using frameworks such as Node.js, Django, or Spring.
- Integrating RESTful APIs and third-party services.
- Managing and optimizing databases using SQL or NoSQL technologies.
- Debugging, testing, and optimizing application performance.
- Ensuring application scalability, security, and responsiveness.
- Working with version control systems such as Git.
- Collaborating with cross-functional teams to deliver high-quality software solutions.

Full-Stack Developer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 2 to 5 years of experience in full-stack or web development or related roles.
- Strong knowledge of programming languages such as JavaScript, Python, or Java.
- Experience with front-end technologies such as HTML, CSS, JavaScript, and frameworks like React, Angular, or Vue.js.
- Experience with back-end frameworks such as Node.js, Django, or Spring.
- Familiarity with databases and SQL or NoSQL systems.
- Understanding of RESTful APIs and web services.
- Proficiency with version control systems such as Git.
- Knowledge of application security and performance optimization.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.
