

ANAS BAHAA ELDIN AHMED ALI

Full-Stack Software Engineer · AI Systems · Cloud & API Architecture

Cairo, Egypt · anasbahaa1010@outlook.com · +20 115 006 9052

[LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Final-year Computing & Digital Technology student (graduating 2026) and Full-Stack Software Engineer with two years of solo, end-to-end production delivery — from enterprise web platforms to AI/NLP applications on Microsoft Azure. Strongest in JavaScript/TypeScript, Python, React/Next.js, Node.js, and Azure OpenAI. Owns systems from database schema to deployed UI without supervision.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind, shadcn/ui, responsive UI, component architecture

Backend: Node.js, Express.js, Python, Flask, REST API design, JWT, OAuth, RBAC, OOP, SOLID

Databases: MongoDB, MySQL, SQLite — schema design, query optimization, indexing

Cloud / DevOps: Microsoft Azure (App Services, OpenAI), Docker, Git, CI/CD

AI / NLP: Azure OpenAI (GPT-4.1, GPT-4o-Transcribe, GPT-4o-mini-TTS), Flair NER, SBERT, spaCy, GLiNER, LLM integration, prompt engineering

Security: Input sanitization, XSS prevention, rate limiting, server-side validation, anti-spam (honeypot)

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer (Freelance) — Siscom Integrated Solutions

Remote · UAE/Egypt

- Owned and shipped two production web platforms end-to-end as the sole engineer — backend API design, database schema, frontend UI, and cloud deployment on Microsoft Azure, with no team for code review or incident recovery.
- Engineered a 4-layer security stack (server-side validation, XSS sanitization, honeypot anti-spam, IP rate limiting) across all client-facing surfaces — zero abuse incidents in 18+ months of production traffic.
- Improved average page-load performance by ~30% via asset compression, lazy loading, image optimization, and MySQL query indexing — measurable Core Web Vitals improvement.
- Refactored 3,000+ lines of legacy PHP/JavaScript into modular OOP services, reducing maintenance overhead and improving readability for future contributors.

KEY PROJECTS

GradVoice — AI Recruitment Platform

Stack: Next.js 16, React 19, TypeScript, Python, Flask, Azure OpenAI (GPT-4.1, GPT-4o-Transcribe, GPT-4o-mini-TTS), Flair NER, MongoDB, jsPDF

- Built end-to-end AI recruitment platform with two integrated products: a CV/JD analyzer (Flair NER + curated keyword dictionaries + Azure GPT-4.1 scoring across 8 weighted dimensions — ~87% skill-match precision, sub-4-second processing per CV-JD pair) and a real-time voice screening agent.
- Designed a two-phase barge-in system for the voice agent (1500ms lockout → continuous-speech detection → interrupt signal) so candidates can naturally interrupt mid-response — no false-positive interruptions observed in testing.
- Architected dual Python Flask backends behind a Next.js 16 / React 19 frontend; load-tested under concurrent user traffic with no degradation, plus defense-in-depth access guards across navigation, CTA, and route layers.
- Delivered structured A4 PDF export (jsPDF), localStorage state persistence, and a curated 134-JD library spanning 12 role categories.

PhoneStation.org — Production Web System

2024 – 2025

Stack: Node.js, PHP, MySQL, JavaScript, Microsoft Azure

- Built a production-grade web platform with security-first architecture — rate limiting, honeypot bot detection, input sanitization, server-side validation — blocking automated bot and spam abuse attempts visible in production logs.
- Reduced average page-load times by ~30% through lazy loading, asset optimization, and MySQL query indexing.

EDUCATION

BSc Computing & Digital Technology — Media Informatics & Mixed Reality

Expected 2026

ESLSCA University, Egypt · GPA: 8.5 / 10

American High School Diploma

Graduated 2023

Pioneers American High School, Giza · GPA: 3.88 / 4.0

CERTIFICATIONS

Cloud Computing Fundamentals — IBM SkillsBuild (2026) · AI Fluency — Anthropic / University College Cork · Watson Assistant: Build AI Chatbots — IBM SkillsBuild · Fingerprint Soft Skills — AIESEC Romania
